

NEXAVOLT ENERGY SOLUTIONS

My name is Bo Håkansson, COO at NexaVolt Energy.

Our mission is to help B2B companies make the best decisions in renewable energy, ensuring you get the most competitive solution from the start—with market-leading prices, professional guidance, and industry-best support.

- ✓ **Tailored solutions for businesses** – Whether your consumption is 20,000 kWh or over 750,000 kWh, we find the optimal solution for you.
- ✓ **The best price from the start** – No wasted time, no negotiations – you get the most competitive price the first time.
- ✓ **Expert advice & strong support** – We ensure you receive the right solution to maximize your savings and returns.
- ✓ **Sustainability with financial benefits** – Invest in renewable energy and strengthen both your green profile and bottom line

Say Goodbye to High Electricity Bills and Unstable Power – Optimize Your Business with Future-Proof Battery Technology! ⚡🌱

- 🏠 **Lower Energy Consumption & Costs** – Store cheap electricity from solar panels or the grid during off-peak hours and use it during peak demand times.
- ⚡ **Stable & Reliable Power Supply** – Avoid power outages and ensure continuous operations, even during grid fluctuations.
- 🌱 **Sustainable Energy Optimization** – Reduce CO₂ emissions and achieve greener operations by maximizing the use of renewable energy.
- 🏭 **Flexibility & Scalability** – A tailored solution for all types of high-energy-consuming businesses, from large factories to holiday resorts.
- 💰 **Lower Grid Fees & Peak Demand Charges** – Avoid expensive grid fees by distributing energy consumption more efficiently.
- 🔌 **Seamless Integration with Solar & Other Energy Sources** – Enhance your solar power system with storage, ensuring energy is available when you need it most.

Businesses with high electricity consumption can achieve **significant savings** and a **future-proof energy solution** by investing in battery technology.

Your Partner in the Future of Energy ⚡🌍

NEXAVOLT ENERGY SOLUTIONS

NexaVolt Energy

We Are FASETECH's Sales Channel Outside the Solar Industry

NexaVolt Energy serves as the official sales division for FaseTech Solar, catering to B2B businesses that do not work directly with solar panels and battery solutions.

- ✓ **Specialized B2B Consulting** – We ensure that companies without industry expertise get the right solution.
- ✓ **Direct Access to FaseTech Products** – Solar panels, inverters, and batteries with fast delivery.
- ✓ **Complete Energy Solutions** – Supported by FaseTech's high-end support and installer network.
- ✓ **One Strong Partner** – While FaseTech focuses on wholesale customers, we open the door to new B2B clients.

Together, we ensure that businesses outside the solar industry receive the **best solutions, strongest support, and most efficient implementation**—delivering **reliable, cost-effective, and high-quality energy solutions** with **fast delivery** as a priority.

Powerful Solar & Battery Solutions ⚡☀️

- ✓ **Complete Solar Solutions** – Fully integrated systems with solar panels, inverters, and battery storage.
- ✓ **High-End Support** – Expert assistance to ensure seamless installation and troubleshooting.
- ✓ **Certified Installers** – Our in-house team of certified professionals guarantees safe and efficient electrical installation.
- ✓ **Fast Delivery** – As a wholesale supplier, we ensure rapid delivery of solar panels, inverters, and batteries across Scandinavia.
- ✓ **Optimized for Large-Scale Projects** – Designed to support large solar farms with robust and scalable solutions.

Your trusted partner in renewable energy – delivered by NexaVolt Energy Solutions, powered by FASETECH SOLAR SYSTEM. 🌍⚡
